

API Automation Test Report

Project Information

Project Name: restful-booker.herokuapp.com

Participant: Jamesy Joseph

Date: 25/06/2026

Branch: Jamesy-25-06-2026

Assessment: API Automation

1. Objective & User Story

Objective

The objective of this automation project is to validate the core functionality of the site using RestAssured API Testing.

The automated test suite validates key user workflows and ensures the site works as expected. It helps run tests consistently and makes it easier to maintain and expand the test coverage.

User Story

As a user, I want to perform the application workflow successfully so that I can complete my task without errors and receive the expected results from the system.

2. Flow Under Test

Scenario 1: Creating Token

1. Open the site.
2. Navigate to the Page.
3. Creating the token with the given credentials(username & password) in the path"/auth" along with BaseUrl("https://restful-booker.herokuapp.com")
4. Storing it for further use.

Scenario 2: Getting the booking IDs

1. Open the site.
2. By using the token searched for the list of booking ids with the path "/booking" along BaseUrl("<https://restful-booker.herokuapp.com>").
3. GET method used.

4. Verified the results having the schema bookings
5. Verify the result is greater than 0.
6. Verify the result size is greater than 0 .

3. Environment & Setup

Application Details

Items – Value

Application URL - restful-booker.herokuapp.com

Framework – RestAssured

Language – java

Runner Test – Maven Test

Browser – Chromium

OS – Windows 11
