Task- Playwright test

Nykaa Page - Homepage and Search Functionality Test

Github link -

Project Title – To test an application [Buy Cosmetics Products & Beauty Products Online in India at Best Price | Nykaa](#)

Objective

To verify that the Nykaa website loads successfully and the search functionality works as expected.

Environment/Config

Workers = 1 = Chromium

timeout:60000

action Timeout: 10000

navigationTimeout:30000

Test Scenario

Scenario: Verify Homepage and Search

Steps:

1. Launch the browser.
2. Navigate to <https://www.nykaa.com/>.
3. Verify that the page title contains "**Nykaa**".
4. Verify that the Search box is visible.
5. Enter the keyword "**pears soap**" in the Search box.
6. Press **Enter** to perform the search.
7. Verify that the URL contains the search term or search page.
8. Verify that search results are displayed.

Expected Result

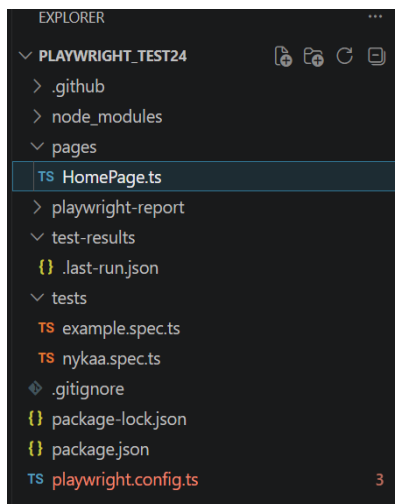

- The homepage should load successfully.
- The page title should contain "pears soap".

- The search box should be visible and editable.
- After searching for "pears soap", the application should navigate to the search results page.
- Relevant products or content related to "pears soap" should be displayed.

Automation Tool

- Framework: Playwright
- Language: TypeScript
- Test Runner: Playwright Test

Project Structure

Codes

HomePage.ts

```
import { Page, Locator, expect } from '@playwright/test';

export class HomePage {

  readonly page: Page;

  readonly searchBox: Locator;

  constructor(page: Page) {

    this.page = page;
```

```
    this.searchBox = page.getByRole('textbox', { name: 'Search' });  
  }
```

```
async openHomePage() {  
  await this.page.goto('https://www.nykaa.com/', { waitUntil: 'domcontentloaded' });  
}
```

```
async searchProduct(product: string) {  
  await this.searchBox.fill(product);  
  await this.searchBox.press('Enter');  
}
```

```
async verifySearchResult(text: string) {  
  await expect(this.page.locator('body')).toContainText(new RegExp(text, 'i'));  
}
```

```
async verifyNoResult() {  
  await expect(this.page.getByText("Thanks for visiting our website!Unfortunately, we  
couldn't find any matches for InvalidProduct12345. Please try searching with another  
term.")).  
}  
}
```

Nykaa.spec.ts

```
import { test } from '@playwright/test';  
import { HomePage } from '../pages/HomePage';
```

```
test('Happy Path - Search available product', async ({ page }) => {  
  const home = new HomePage(page);  
  await home.openHomePage();  
  await home.searchProduct('pears soap');
```

```

    await home.verifySearchResult('pears soap');
  });

test('Negative Path - Search unavailable product', async ({ page }) => {

  const home = new HomePage(page);

  await home.openHomePage();

  await home.searchProduct('InvalidProduct12345');

  await home.verifyNoResult();

});

```

Run Test(nykaa.spec.ts) Command

npx playwright test nykaa.spec.ts --debug

npx playwright test nykaa.spec.ts --headed
