

REST Assured API Automation Framework Report

Project Title

API Automation Testing Framework for Booking a flight API using REST Assured and JUnit 5

1. Objective

The objective of this project is to design and implement a reusable API automation testing framework using REST Assured to validate Flight Booking APIs.

2. User Story

As a QA Automation Engineer,

I want to automate Flight Booking API endpoints

So that

I can verify API behavior, validate response contracts, and ensure data integrity without manual testing.

3. API Details

Base URL

[TripStack API Reference](#)

4. Environment & Setup

Hardware

Processor:

Intel Core i5 or above

RAM:

8 GB

Storage:

Minimum 10 GB

Software

Operating System:
Windows 10 / Windows 11

IDE:
IntelliJ IDEA

Programming Language:
Java 17+

Build Tool:
Maven

Test Framework:
JUnit 5

API Testing:
REST Assured

Schema Validation:
JSON Schema Validator

Version Control:
Git

Repository:
GitHub / GitLab

5. Project Structure

6. Scenarios Covered

Scenario

Booking a flight successfully

Validation:

- Status code
- Response body
- Schema validation

Expected:

200 OK

7. Evidence:

```
Content-Type=application/json
cookies:      <none>
multipart:    <none>
body:        <none>
INFO] Tests run: 1, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.560 s -- in com.capstone.tests.BookingApiTest
INFO]
INFO] Results:
INFO]
INFO] Tests run: 1, Failures: 0, Errors: 0, Skipped: 0
INFO]
INFO] -----
INFO] BUILD SUCCESS
INFO] -----
INFO] Total time: 12.996 s
INFO] Finished at: 2026-07-17T18:31:25+05:30
INFO] -----
```

8. How to Run

Open terminal.

Execute:

mvn clean test

Run individual test:

mvn -Dtest=ProductTest test

Run from IDE:

Right Click ProductTest → Run

9. Test Results

Booking a flight successful: Pass

10. Conclusion

The REST Assured API Automation Framework was successfully developed to automate Booking a flight APIs.
