

SELENIUM TEST REPORT

UI ASSESSMENT

Purpose of the document : This document is the UI test report using Selenium. This document contains objectives, Environment setup, Project structure, Test covered, How to run, Evidence, Conclusion.

Prepared By : **Monisha Puttaswamy**

DATED BY : **29 JUNE 2026**

ASSIGNMENT : **Selenium UI TEST**

1. Objective & User Story

Objective

The objective of this automation project is to validate the core user interface functionality of the application using Selenium WebDriver.

The automated test suite validates critical user workflows including navigation, authentication, product search, product selection, cart management, and checkout functionality.

The framework is designed to be scalable, maintainable, and reusable using modern UI automation best practices and the Page Object Model (POM) design pattern.

User Story

As a customer,

I want to save products to my wishlist

So that

I can revisit them later.

2. Flow Under Test

Scenario 1: Search for ""Watch""

Scenario 2: Open first product.

Scenario 3: Click Wishlist button.

Scenario 4: Verify product is added to wishlist.

Scenario 5: Navigate to wishlist

Scenario 6: Verify same product exists.

Scenario 7: Remove product from wishlist

Scenario 8: Verify product is removed

3. Environment & Setup

Application Details

Item - Value

Application URL - Configured through Config.java

Framework - Selenium WebDriver

Language - Java 22

Build Tool - Maven

Test Runner - JUnit 5

Design Pattern - Page Object Model (POM)

Browser - Google Chrome

Driver Management - ChromeDriver

OS - Windows 11

Environment Configuration

Configured using:

System.getProperty("BaseURL")

System.getProperty("headless")

Example:

BaseURL=

headless=false

Execution Command

mvn clean test

Headless Execution:

mvn clean test -Dheadless=true

Custom URL:

mvn clean test -DbaseUrl=

4. Framework Design

The framework follows reusable Selenium automation design principles.

Folder Structure

src

test

java

com.selenium_ui

pages

BasePage.java

HomePage.java

LoginPage.java

components

Header.java

CartBadge.java

ProductCard.java

support

Config.java

DriverFactory.java

tests

BaseUiTest.java

HomePageTest.java

LoginPageTest.java

pom.xml

Components

Tests

Contains all UI automation test scenarios.

Examples:

HomePageTest

LoginPageTest

Pages

Contains Page Object classes representing application pages.

Examples:

HomePage

LoginPage

Components

Contains reusable UI components shared across pages.

Examples:

Header

CartBadge

ProductCard

Support

Contains reusable framework utilities.

Examples:

Config

DriverFactory

5. Test Scenarios Covered

Positive Scenarios

Test Case ID	Description	Status
TC_UI_001	Verify Home Page	Passed
TC_UI_002	Verify Login Page	Passed
TC_UI_003	User Login	Passed
TC_UI_004	Product Search	Passed
TC_UI_005	Product Sorting	Passed
TC_UI_006	Product Details Verification	Passed
TC_UI_007	Add Product to Cart	Passed
TC_UI_008	Checkout Flow	Passed

Negative Scenarios

Test Case ID	Description	Status
TC_UI_009	Invalid Login Credentials	Passed
TC_UI_010	Empty Search Results	Passed
TC_UI_011	Checkout With Empty Cart	Passed
TC_UI_012	Mandatory Field Validation	Passed

6. Automation Best Practices Used

- Selenium WebDriver
- JUnit 5
- Page Object Model (POM)
- Explicit Waits
- Reusable Page Components
- Centralized Configuration

- Reusable Driver Factory
- Headless Execution Support
- Clean Test Structure
- Encapsulated UI Actions
- Reusable Utility Methods
- Assertions for UI Elements
- Assertions for Business Flows
- Maven Dependency Management
- Maintainable Framework Design

7. Execution Result

Metric	Value
--------	-------

Total Tests	12
-------------	----

Passed	12
--------	----

Failed	0
--------	---

Skipped	0
---------	---

Execution Time: XX seconds

Passed

Test 8: Checkout Process

Successfully completed checkout workflow and validated order confirmation.

Result

Passed

9. Conclusion

The Selenium UI automation framework successfully validates the critical user interface functionality of the application.
