Project Title – To test an application [Shoppers Stop End of Season Sale | Up to 50% Off Across Categories](#)

Shoppers Stop - Homepage and Search Functionality Test

Objective

To verify that the Shoppers Stop website loads successfully and the search functionality works as expected.

Test Scenario

Scenario: Verify Homepage and Search

Steps:

1. Launch the browser.
2. Navigate to <https://www.shoppersstop.com/>.
3. Verify that the page title contains "**Shoppers Stop**".
4. Verify that the Search box is visible.
5. Enter the keyword "**Shoes**" in the Search box.
6. Press **Enter** to perform the search.
7. Verify that the URL contains the search term or search page.
8. Verify that search results are displayed.

Expected Result

- The homepage should load successfully.
- The page title should contain "Shoppers Stop".
- The search box should be visible and editable.
- After searching for "Shoes", the application should navigate to the search results page.
- Relevant products or content related to "Shoes" should be displayed.

Automation Tool

- Framework: Playwright

- Language: TypeScript
- Test Runner: Playwright Test

Test File

shoppersstop.spec.ts

Execution Command

npx playwright test shoppersstop.spec.ts
