

REST Assured API Automation Framework Report

Project Title

API Automation Testing Framework for Creating a record using REST Assured and JUnit 5

1. Objective

The objective of this project is to design and implement a reusable API automation testing framework using REST Assured to validate Creating a record.

2. User Story

As a QA Automation Engineer,

I want to automate Create record API endpoint

Acceptance Criteria

- User should create a records.
-

3. API Details

Base URL

[JSONPlaceholder - Free Fake REST API](#)

4. Environment & Setup

Software

Operating System:

Windows 10 / Windows 11

IDE:

IntelliJ IDEA

Programming Language:

Java 17+

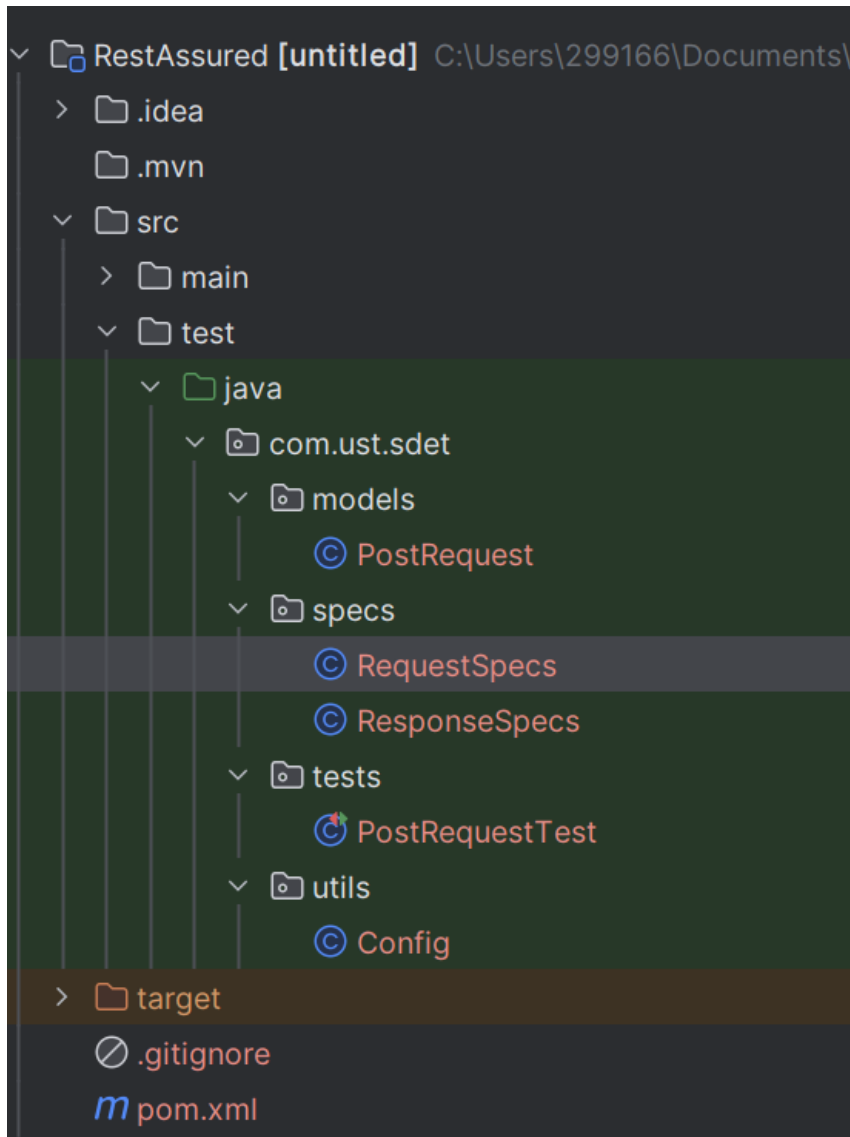

Build Tool:

Maven

Test Framework:

JUnit 5

5. Project Structure

6. Scenario

Create a record using POST method

Test Data:

{

"title": "Automation Testing",

"body": "Rest Assured Assignment",

"userId": 1

}

Validation:

- Status code
- Response body

Expected:

201 CREATED

7. How to Run

Open terminal.

Execute:

mvn clean test

8. Test Results

Scenario	Status
----------	--------

create record	Pass
---------------	------

Overall Execution:

Successful

9. Evidence

```
