

ASSESSMENT - WEEK 5

REPORT

Objective

To produce artifact and log for test cases and debug the flaky test using those artifacts.

PROJECT STRUCTURE

SCENARIOS COVERED

Scenario 1: Adding product to cart flow – included logging

```
PS C:\Users\307391\Desktop\SDET\repos\week5\SDET> npx playwright test ./productToCart.spec.ts --headed

Running 2 tests using 2 workers

2 passed (7.8s)

To open last HTML report run:
npx playwright show-report
```

Scenario 2: Intentional flaky test.

Not fixing this code. Leaving it as flaky test.

To fix: remove the waitForTimeOut

remove textContent()

assert it with .toHaveText()

```
PS C:\Users\307391\Desktop\SDET\repos\week5\SDET> npx playwright test ./flaky.spec.ts --repeat-each=10

Error Context: test-results\flaky-flaky-sync-lab-test-webkit-repeat8\error-context.md

2 failed

}
```

Issue: WebKit is slow while rendering the page.

Fix: Replaced the assertion to check the banner with the assertion to verify the outbox count is incrementing.

```
log.info("Network switched off");
await context.setOffline(true);

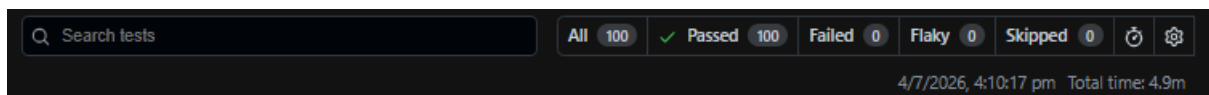

await page.getByRole("button", { name: "Queue sale" }).click();
log.info("Queued sale while offline");
await expect(page.getByTestId("outbox-count")).toHaveText("1");

await context.setOffline(false);

log.info("Network restored");
await expect(page.getByTestId("outbox-count")).toHaveText("0");
log.info("Verified outbox flushed");

await expect(attempts).toBe(2);
await expect(successPost).toBe(1);
```

Execution after fix: npx playwright test ./offline.spec.ts --repeat-each=50

[illegible]

Scenario 4: Refund posts twice - No idempotency key - Idempotency-Key + ledger - refundCount === 1
