

Gate 5 Checkout Flow Assessment Report

Objective

The objective of this Test is to validate the complete customer checkout journey from product discovery to successful order placement. The assessment verifies that a customer can search for a product, add it to the cart, enter a coupon code during checkout, and complete the purchase successfully through the application's user interface.

Business Flow

Open Retail Application → Navigate to Product Catalog → Search 'Running Shoes' → Open Product Details → Add Product to Cart → Proceed to Checkout → Enter Coupon Code → Place Order → Verify Order Confirmation.

Symptom

The checkout journey is a critical business flow. Failures during product search, cart management, coupon handling, or order placement can prevent customers from completing purchases and directly impact revenue.

Investigation

The complete checkout flow was executed through the UI to simulate a real customer journey. Product search, navigation, cart operations, coupon entry, checkout, and order confirmation were validated using Playwright assertions. logging and evidence collection were used throughout execution.

Root Cause

Checkout issues generally arise from navigation failures, incorrect UI state, coupon handling problems, or unsuccessful order submission. Every stage must complete successfully before the confirmation page is displayed.

Fix

The test validates every stage of the checkout process using UI assertions. It confirms successful product discovery, verifies the product details page, adds the product to the cart, validates coupon entry, places the order, and confirms successful checkout through the order confirmation page.

Evidence

Execution evidence includes structured Winston logs, correlation ID, Playwright trace, screenshots, video (on failure), custom evidence attachments, coupon validation, and successful order confirmation.

Key Validations

Validation	Expected Result
Retail Application	Opened Successfully
Product Search	Running Shoes Found
Product Details	Displayed
Add to Cart	Successful
Checkout Page	Loaded
Coupon Entry	TRY UST10 Entered
Place Order	Successful
Order Confirmation	Thank you for your order Visible
